In each century since the beginning of the world wonderful things have been discovered. In the last century more amazing things were found out than in any century before. In this new century hundreds of things still more astounding will be brought to light. At first people refuse to believe that a strange new thing can be done, then they begin to hope it can be done, then they see it can be done—then it is done and all the world wonders why it was not done centuries ago. One of the new things people began to find out in the last century was that thoughts—just mere thoughts—are as powerful as electric batteries—as good for one as sunlight is, or as bad for one as poison. To let a sad thought or a bad one get into your mind is as dangerous as letting a scarlet fever germ get into your body. If you let it stay there after it has got in you may never get over it as long as you live.

So long as Mistress Mary' s mind was full of disagreeable thoughts about her dislikes and sour opinions of people and her determination not to be pleased by or interested in anything, she was a yellow-faced, sickly, bored and wretched child. Circumstances, however, were very kind to her, though she was not at all aware of it. They began to push her about for her own good. When her mind gradually filled itself with robins, and moorland cottages crowded with children, with queer crabbed old gardeners and common little Yorkshire housemaids, with springtime and with secret

gardens coming alive day by day, and also with a moor boy and his "creatures," there was no room left for the disagreeable thoughts which affected her liver and her digestion and made her yellow and tired.

Taking the pursuit of development in a scientific way as the underlying guideline and accelerating the change of the growth model as a major task is a strategic choice we have made for promoting China's overall development. In response to changes in both domestic and international economic developments, we should speed up the creation of

a new growth model and ensure that development is based on improved quality and performance. We should fire all types of market participants with new vigor for development, increase motivation for pursuing innovation-driven development, establish a new system for developing modern industries, and create new favorable conditions for developing the open economy. This will make economic development driven more by domestic demand, especially consumer demand, by a modern service industry and strategic emerging industries, by scientific and technological progress, by a workforce of higher quality and innovation in management, by resource conservation and a circular economy, and by coordinated and mutually reinforcing urban-rural development and development between regions. Taking these steps will enable us to sustain long-term development.

We should keep to the Chinese-style path of carrying out industrialization in a new way and advancing IT application, urbanization and agricultural modernization. We should promote integration of IT application and industrialization, interaction between industrialization and urbanization, and coordination between urbanization and agricultural modernization, thus promoting harmonized development of industrialization, IT application, urbanization and agricultural modernization.
